

Document conversion test

This is an artificial PDF for software testing, not clinical evidence.
The application must preserve Unicode text: español, français.
Two pages, a short table, headings and a footnote follow.

Table 1. Artificial values

Group	N	Value
Sample A	10	8
Sample B	12	5

Note: N is an arbitrary count. No results represent real patients.

Second page: provenance

This second page tests ordering and page attribution.

Unique marker: FOLIO-PAGE-TWO-9281.

All values in this fixture are invented for conversion testing.

Page numbers refer to PDF order, not journal pagination.
